

# DAOSYS Status Report - Sprint 02

## Table of Contents

1. Initial Project Scope and Schedule .....	1
2. Deliverables Status .....	1
3. Expanded Project Scope and Schedule .....	2

## 1. Initial Project Scope and Schedule

Target Schedule - 6 months from project kick-off. Target Milestone - Ready for deployment with launch of Syscoin L2 solution. Early deployment to BNBChain. MVP Target Schedule - 2 months from project kick-off

### Target MVP Deliverable Features

- Autonomous Service Engine
- DAOSYS ASE based vaults
- Uniswap V2 compatible liquidity management
- Mooniswap fork DEX
- Rebasing Market Index ERC20 Token
- Custom tokenomic design to create foundational market for \$SYS and \$WSYS
- Web3 UI Skeleton

The schedule shown is for the launch MVP of DAOSYS. Because the current defi ecosystem does not provide sufficient utility for \$SYS or \$WSYS the remaining 4 months is reserved for designing and expanding the current ecosystem with DAOSYS integrations. The launch MVP is intended to provide the base functionality of decentralized capital coordination to fund development. Relying upon the DEX market created with the DAOSYS vault tokens. This provides the baseline market that can be used as the index for additional defi protocols. The time between launch and integration with defi protocols allows for real market data for those protocols to assess for their configuration. Such as interest rates collateralization requirements.

## 2. Deliverables Status

- Autonomous Service Engine - Completed
- DAOSYS ASE based vaults - In Progress Delayed

- Uniswap V2 compatible liquidity management - In Progress On Schedule
- Mooniswap fork DEX - Planned Delayed
- Rebasing Market Index ERC20 Token
  - Rebasing Token - Completed
  - Continuous Market Index Rebasing - In Progress Delayed
- Custom tokenomic design to create foundational market for \$SYS and \$WSYS - Completed
- Web3 UI Skeleton - In Progress On Schedule

## 3. Expanded Project Scope and Schedule

Target Schedule - 6 months from project kick-off. Target Milestone - Ready for deployment with launch of Syscoin L2 solution. In-scope Milestone Dependency - L2 is ready for smart-contract deployment MVP Target Schedule - 3 months from project kick-off

### Remaining Target MVP Deliverable Features

- DAOSYS ASE based vaults
- Uniswap V2 compatible liquidity management
- Mooniswap fork DEX
- Rebasing Market Index ERC20 Token
- Web3 UI Skeleton

### Expanded Deliverables

- L2 technology assessments for adoption
- L2 Proof of Concept connected to Syscoin testnet
- L2 Production deployment
- Defi Research Simulation Framework
- Defi Protocol assessments for vault integration
- DAOSYS Vault to DaoTown integration
- DAOSYS Quest to Dework integration
- EFIU Cryptocurrency Seminar
- EFIU State L2 Proposal

EFIU = Estonia Financial Investigation Unit
